is one writer/teacher's account of how to expect the unexpected and how, even, to encourage, nurture, and make use of it. Since the publication of his groundbreaking books Writing Without Teachers and Writing with Power, Peter Elbow has revolutionized how people think about writing. Now, in Vernacular Eloquence, he makes a vital new contribution to both practice and theory. The core idea is simple: we can enlist virtues from the language activity most people find easiest—speaking—for the language activity most people find hardest—writing. Speech, with its spontaneity, naturalness of expression, and fluidity of thought, has many overlooked linguistic and rhetorical merits. Through several easy to employ techniques, writers can marshal this "wisdom of the tongue" to produce stronger, clearer, more natural writing. This simple idea, it turns out, has deep repercussions. Our culture of literacy, Elbow argues, functions as though it were a plot against the spoken voice, the human body, vernacular language, and those without privilege—making it harder than necessary to write with comfort or power. Giving speech a central role in writing overturns many empty preconceptions. It causes readers to think critically about the relationship between speech, writing, and our notion of literacy. Developing the political implications behind Elbow's previous books, Vernacular Eloquence makes a compelling case that strengthening writing and democratizing it go hand in hand.

THE WELL-CRAFTED ARGUMENT, 6th Edition, guides students through the process of writing effective arguments across the disciplines. The two-part structure of this rhetoric/reader includes a complete pedagogical apparatus—with coverage of critical reading strategies as well as writing, researching, and documenting a topic—and an anthology of readings grouped into six thematic clusters. In-depth instruction, combined with real student writings, engages students and helps them discover their own voices. The text's visual emphasis and the authors' practical skill-building approach are enhanced with a full-color format. Summaries and checklists in Part I, Connections Among the Clusters and other study aids in Part II, and writing projects throughout the text encourage students to apply what they've learned. In addition to guidance on drafting and revising arguments, the authors provide a variety of composition strategies, including freewriting, outlining, and shared reading.
